

## The "Loud" Speaker

Providing an amplified repetition of the loudest conversation in the room.

## Spotlight on the Talker

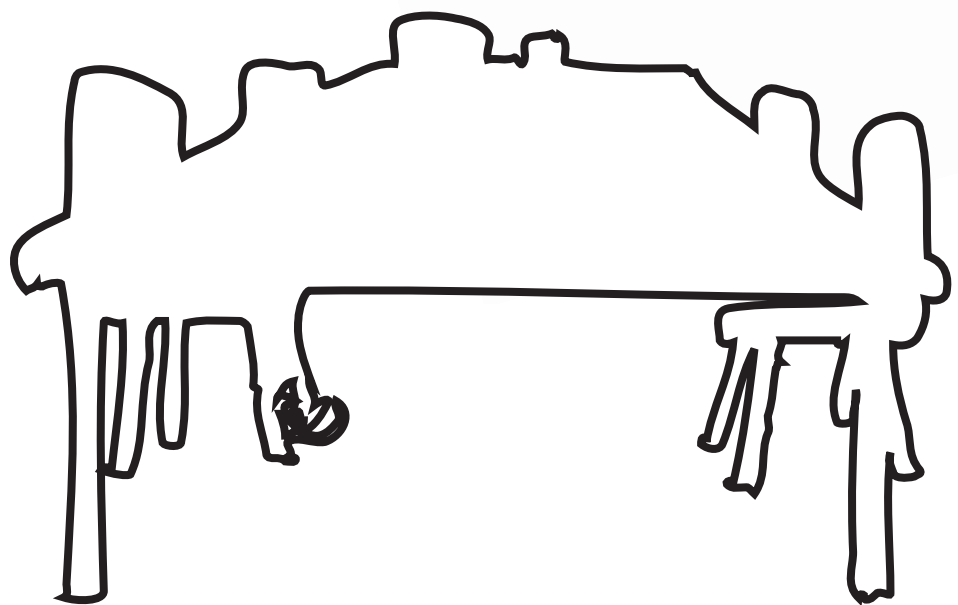

Illuminating the offending speaker when their voice goes above a certain decibel.

CAUTION NOISY

## LED wall display

Giving a sense of "Big Brother is listening", this device displays the current noise levels in the room. The louder you are, the more honest it will be.

# Public Conversations

Upstairs at the UC, people study, socialize, and sleep. Amongst the chatter, there can sometimes be **ONE VOICE** that surpasses all the others. There is something about the tone, clarity or the diction that forces you to listen.

What if the tables were turned?
